

Subcommittee on Hydrology

Presentation to:
Advisory Committee on Water Information
July 12, 2011

Overview

- Subcommittee Membership
- Work Group Reports
 - Hydrologic Frequency Analysis Work Group (HFAWG)
 - Extreme Storm Events Work Group
 - Hydrologic Modeling Work Group
 - GIS Applications in Hydrology and Hydraulics Work Group (GISA)
 - Satellite Telemetry Interagency Work Group (STIWG)
- Other Activities
 - Federal Data Sharing
 - SOH Connections Newsletter

Subcommittee Membership

Member organization resignations:

- American Forests (*result of reorganization*)

New member organizations:

- Global Ecosystems Center (GEC) (*established when American Forests reorganized*)
- California Division of Water (*inquired about membership*)

Hydrologic Frequency Analysis Work Group (HFAWG)

- Wilbert O. Thomas, Jr., Chair,
Michael Baker, Jr. representing the Association
of State Floodplain Managers,
WTHOMAS@mbakercorp.com

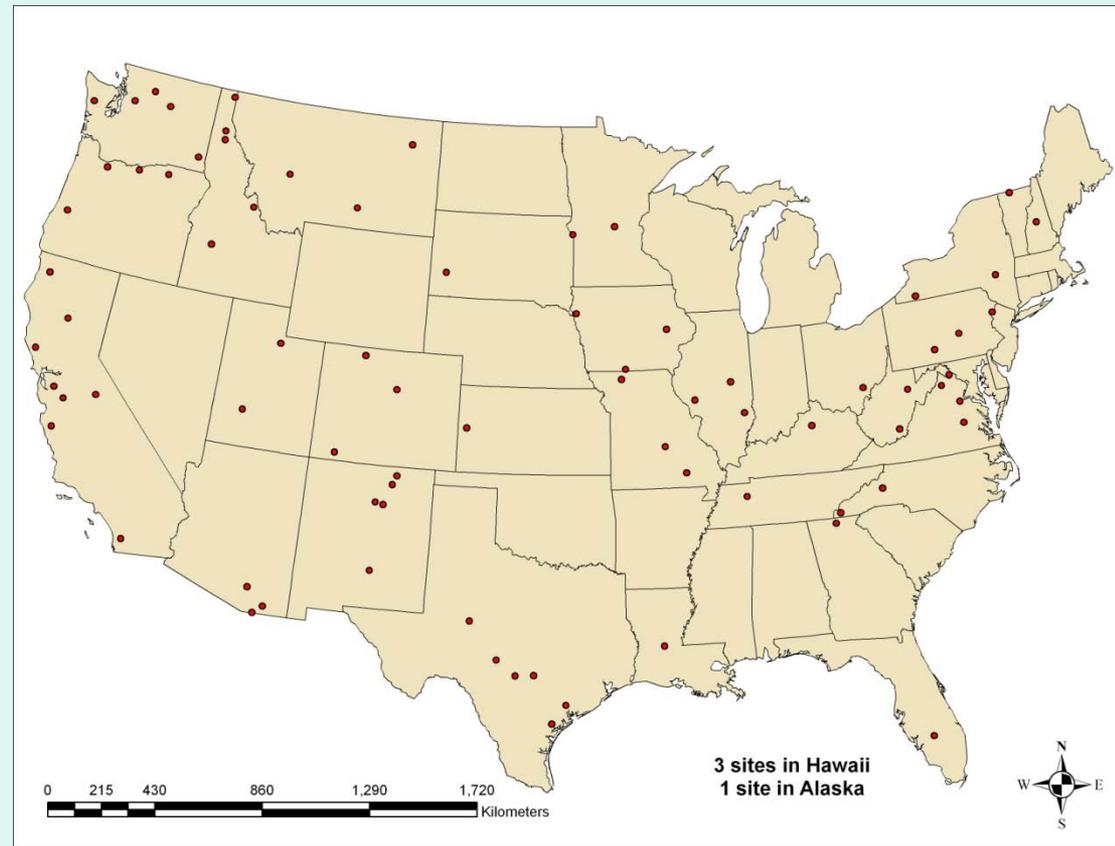

Hydrologic Frequency Analysis Work Group

- The HFAWG is evaluating potential improvements to Bulletin 17B (see HFAWG web site for details <http://acwi.gov/hydrology/Frequency>):
 - Expected Moments Algorithm (EMA) = new statistical technique for estimating moments of the Pearson Type III distribution
 - Evaluate and compare EMA and Bulletin 17B for analyzing data sets with historic and paleoflood data, low outliers and zero flows

Hydrologic Frequency Analysis Work Group

Testing EMA for:

- 82 gaging stations with an average record length of 80 years (see map for locations of stations)
- Monte Carlo simulations for assumed frequency distributions

Hydrologic Frequency Analysis Work Group

- Progress to date:
 - Testing in 2009-2010 indicated a need for a new low-outlier detection method
 - A Generalized Grubbs-Beck test was developed and incorporated in the EMA code
 - Data for the 82 stations were reanalyzed using the new computer code
 - Preliminary results indicate more low outliers are detected – may be an effective way to deal with the low-outlier issue

Hydrologic Frequency Analysis Work Group

- Future plans:
 - Complete EMA-Bulletin 17B testing and document results
 - Update the November 2009 report of test results
 - Convene a HFAWG meeting and make decisions about revisions to Bulletin 17B
 - Make recommendations to SOH (and eventually ACWI) on revisions to Bulletin 17B

Extreme Storm Events Work Group

- Interim Chair:
Thomas J. Nicholson, U.S. Nuclear Regulatory
Commission; 301-415-6268;
Thomas.Nicholson@nrc.gov
- Vice-Chair:
Dr. John England, Bureau of Reclamation; 303-
445-2541; jengland@do.usbr.gov

Extreme Storm Events Work Group

- Developing a draft proposal for updating PMP estimates for the U.S. using a 2-Phase approach
- Asked member agencies to submit a short narrative on their agency need for updating PMP estimates
- Proposal is an outline for potential work which does not identify who will do the work or funding sources

Extreme Storm Events Work Group

- Phase 1:
 1. Background and Need statement
 2. Summary literature review
 3. Update storm rainfall catalog
 4. PMP updates of HMR using existing methods
 5. Define Federal Interagency Technical Oversight Group, its functions, capabilities, requirements
- Phase 2:
 1. Detailed literature review on potential new methods
 2. Evaluating and testing of select new methods
 3. PMP updates of HMRs

Extreme Storm Events Work Group

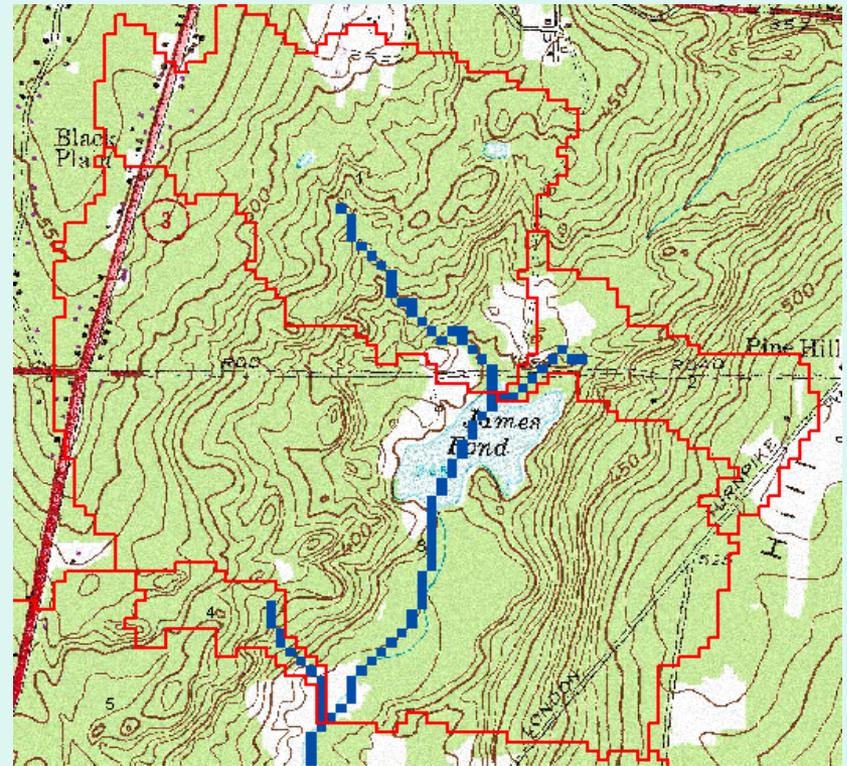

- Developing a draft proposal for updating PMP estimates for the U.S. using a 2-Phase approach
- Asked member agencies to submit a short narrative on need for updated PMP estimates
- Proposal is an outline for potential work - does not identify who will do the work or funding sources

Hydrologic Modeling Work Group

- Jerry Webb, US Army Corp of Engineers (USACE), Jerry.w.webb@usace.army.mil, (202) 761-0673
- Joe Giacinto, Vice-Chair, Nuclear Regulatory Commission, Office of New Reactors, joseph.giacinto@nrc.gov, (301) 415-0714

Hydrologic and Hydraulic GIS Applications Work Group

- William Merkel, Chair,
Natural Resources
Conservation Service,
william.merkel@wdc.usda.gov,
(301) 504-3956

Accomplishments

- Presented three papers at professional conferences
- Demonstrated GIS applications
- Distributed questionnaire to federal agencies and others.
- Developed page with web links to major applications.
- <http://hydrologicmodels.tamu.edu/>

Hydrologic Modeling Inventory Website

Welcome to the Hydrologic Modeling Inventory Website. This is a collaborative effort between [Texas A&M University](#) and the [Bureau of Reclamation](#) to provide basic information on a variety of hydrologic models to practitioners in the academic, governmental and private sectors.

The effort was started in 1999 as a collaborative effort between Louisiana State University and the Bureau of Reclamation. Developers of well known models were contacted by Dr. Vijay P. Singh, Dr. Donald K. Frevert and several other Bureau of Reclamation staff members. Each developer was asked to fill out a questionnaire providing basic information including the capabilities of their model, input requirements, output information, assumptions, hardware requirements and contact information. The questionnaires were originally posted on a Bureau of Reclamation website, but in 2007 the website was moved to the Texas A&M domain to facilitate support and maintenance. Developers have been contacted in subsequent years to update the information on their respective models and new models continue to be added as appropriate.

Visitors to the website will click on the link at the bottom of this page and will be directed to a page with a listing of model links which, in turn, will direct the visitor to the summary sheet for each model. More detailed information on specific models can be obtained by contacting the developers and the e-mail, phone or mailing addresses indicated.

Comments and suggestions for the Hydrologic Modeling Inventory Website are welcome.

Dr. Vijay P. Singh
Caroline and William N. Lehrer
Distinguished Chair in Water Engineering
Professor of Civil and Environmental Engineering
Professor of Biological and Agricultural Engineering
Texas A and M University
Scoates Hall, 2117 TAMU
College Station, Texas 77843-2117

Office Phone: (979)-845-7028
E-mail: vsingh@tamu.edu

Dr. Donald K. Frevert
Water Resources Division
Technical Service Center
Bureau of Reclamation
Mail Code 86-68520
P.O. Box 25007
Lakewood, CO 80225-0007

- [StreamStats](#)
- [Soil and Water Assessment Tool \(SWAT\)](#)

Current and future activities

- Teleconference scheduled
- Prepare draft report for review by Workgroup and SOH.
- Prepare final report on Workgroup activities.

Satellite Telemetry Interagency Work Group

- Chair, Robbie Swofford, Bureau of Land Management,
- Dan Schwitalla, U.S. Geological Survey,
dschwit@usgs.gov, 443-498-5605

Federal Data Sharing

- Dave Goodrich, USDA – Agricultural Research Service, dave.goodrich@ars.usda.gov, 520-647-9241 ext. 144

SOH Connections

- **Editor:**
Richard Raione, U.S. Nuclear Regulatory Commission,
richard.raione@nrc.gov,
(301) 415-7190
- **Associate Editor:**
Joseph Giacinto, U.S. Nuclear Regulator Commission,

Subcommittee on Hydrology

PURPOSE

Improve the availability and reliability of surface-water quantity information needed for hazard mitigation, water supply and demand management, and environmental protection.
