

10th NATIONAL MONITORING CONFERENCE

Working Together for Clean Water

May 2 – 6, 2016

Tampa, Florida

Save the Date!

The National Water Quality Monitoring Council will host its 10th National Water Monitoring Conference on May 2-6, 2016 in Tampa, Florida. This national forum is designed for all water stakeholders, including federal, state, tribal and local water professionals, non-profits, academia, and volunteer citizen scientists.

Attendees will network, develop partnerships and new skills, and exchange information and technology related to all water resources, including rivers and streams, lakes, wetlands, coastal waters and estuaries, groundwater, and processed water. Conference themes attract professional papers and posters addressing a variety of topics ranging from monitoring and assessment to protection and restoration, as well as cutting-edge technologies and methods.

2016 Conference Themes Include:

- **Monitoring Designs for Tackling 21st Century Problems**
- **Connecting Coasts, Estuaries, and Freshwater Ecosystems**
- **Innovations in Monitoring and Assessment**
- **Identifying and Assessing Emerging Risks**
- **Measuring Effectiveness of Water Management Actions**
- **Managing, Sharing, Communicating, and Mining Data**
- **Building Monitoring Collaborations**
- **Assessing Trends in Water Resources**

Join us in beautiful and vibrant Tampa, Florida on the Hillsborough River at the edge of Tampa Bay! The city's rich history and modern landscape offer visitors a wide variety of attractions. Tampa Bay is Florida's largest open water estuary and home to an impressive variety of wildlife, including manatees, wading birds, and prized sport fish.

Please distribute this announcement to your staff and water colleagues
