GOES DCS Overview

Virtual STIWG: Technical Revew Meeting
Thursday, 13 December 2018

Richard Antoine, GOES DCS Program Manager
Richard.Antoine@noaa.gov

Overview of Key GOES DCS Projects

- DADDS Refresh – Replacing 10 year old servers and software at Wallops, VA ground station, NSOF and Microcom Development system

  - Development system installed 02 Nov 2018

  - NSOF DADDS backup scheduled week of 07 Jan 2019

  - WCDAS DADDS primary scheduled week of 11 Feb 2019

- Over the Air Two Way Prototype Test – continued effort to provide a command and interrogate capability for remotely located user Data Collection Platforms (DCPs)

- DCS Channel Optimization – Develop a migration scheme for CS1 frequency assignment table to CS2 Frequency Assignment Table in order to expand the number of channels available to users
