

## National Monitoring Conference 2002

---

### *Building a Framework for the Future*

## Acknowledgments

The first two sentences of the Acknowledgments in the *1998 Proceedings of the National Water Quality Monitoring Council (NWQMC) National Monitoring Conference* read, "The National Water Quality Monitoring Council is indebted to Elizabeth Fellows (U.S. EPA) and Nancy Lopez (USGS) for their vision, leadership, energy, and generous contribution to the creation of the Intergovernmental Task Force on Monitoring (ITFM) and its subsequent evolution into the Council. The Council is also thankful to Ms. Fellows for being the first to recognize the need for a conference to focus national attention on the issue of monitoring." Though we have lost Elizabeth, we remain indebted to her for all of the above and more. This conference is dedicated to her memory.

The Council, currently chaired by Chuck Spooner (U.S. EPA) and Gail Mallard (USGS), offers its gratitude to those who served on the Conference Planning Committee. This committee designed the conference format, reviewed all of the abstracts submitted and worked diligently to ensure the success of this conference. The Council also acknowledges the commitment and hard work of all those who served as track leaders, session moderators, workshop facilitators and speakers. Last but not least, many thanks go to all of the environmental monitoring professionals who submitted abstracts and prepared presentations. The numerous individuals and agencies contributing to the success of this conference are listed below:
