

BIOLOGICAL ASSESSMENT OF WATER QUALITY: DELIVERY OF A NATIONAL SYSTEM IN AUSTRALIA

R.H.Norris

Institute for Applied Ecology and eWater
CRC, University of Canberra, ACT, 2601.

Don't mess with my rivers!

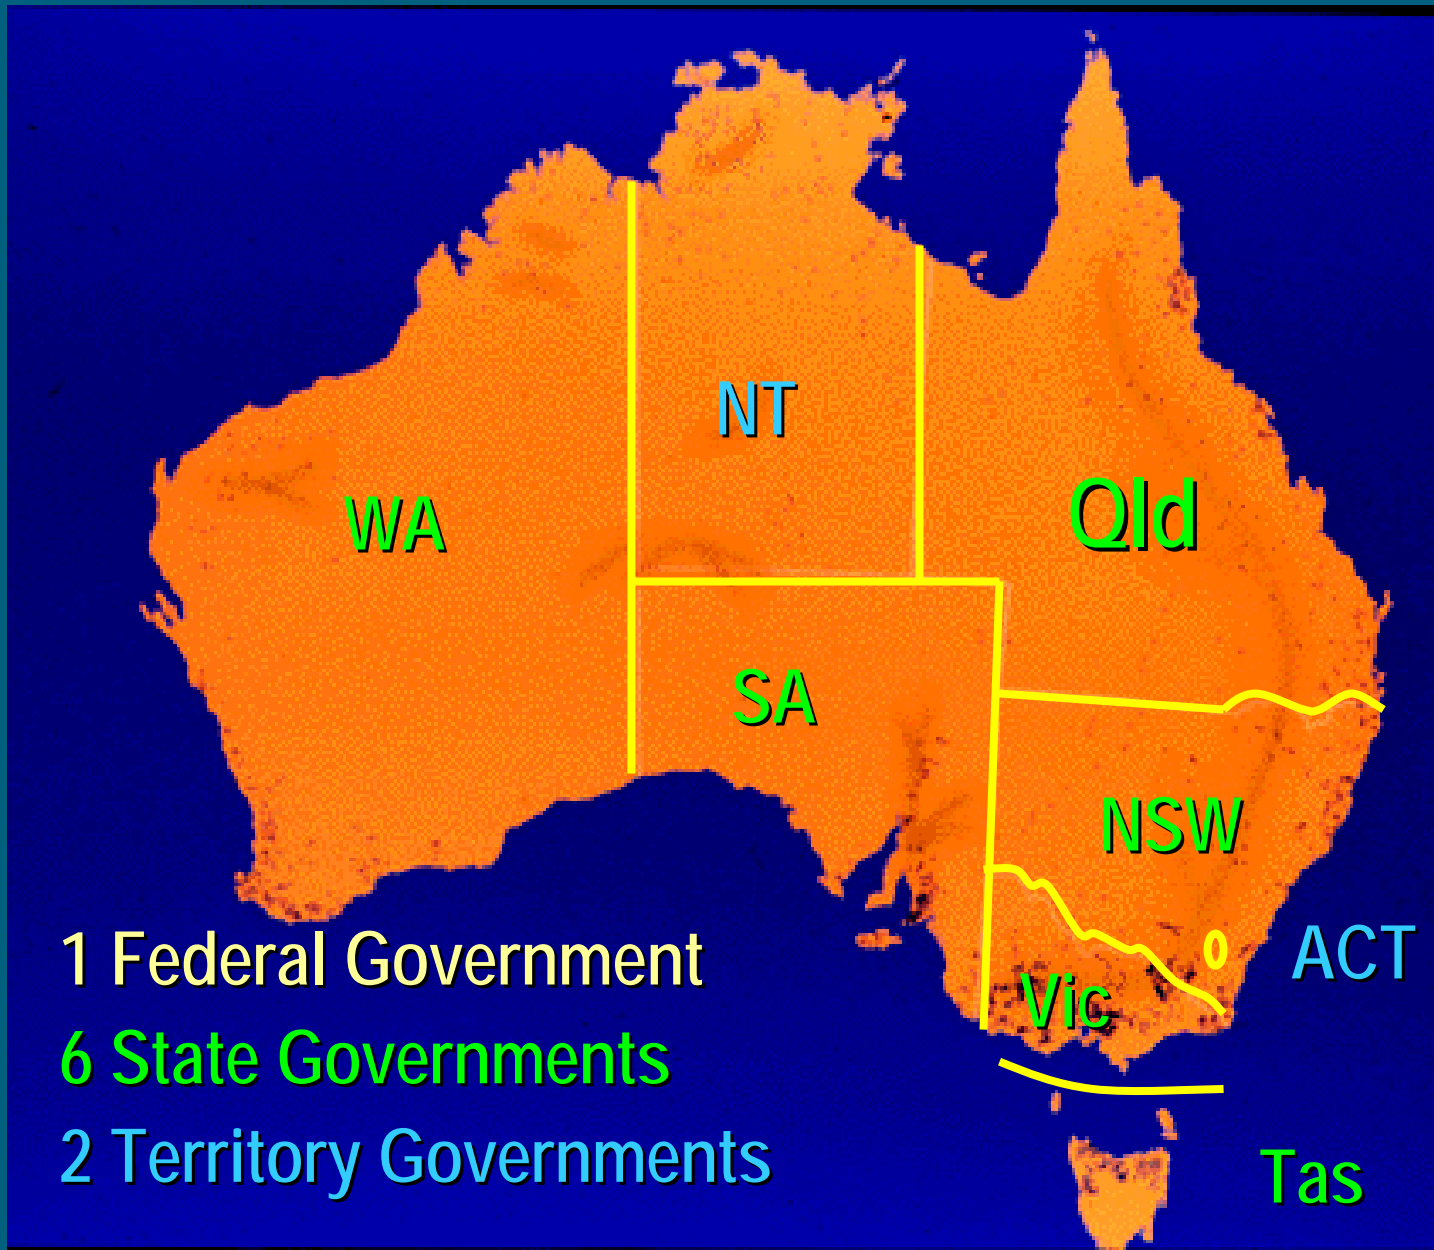

National River Health Program

Why the Program?

The 1200 km Darling River Blue-Green algal bloom in 1991 brought the health of the nation's rivers to prominence.

Australian Governments

“Resolving Key Issues”

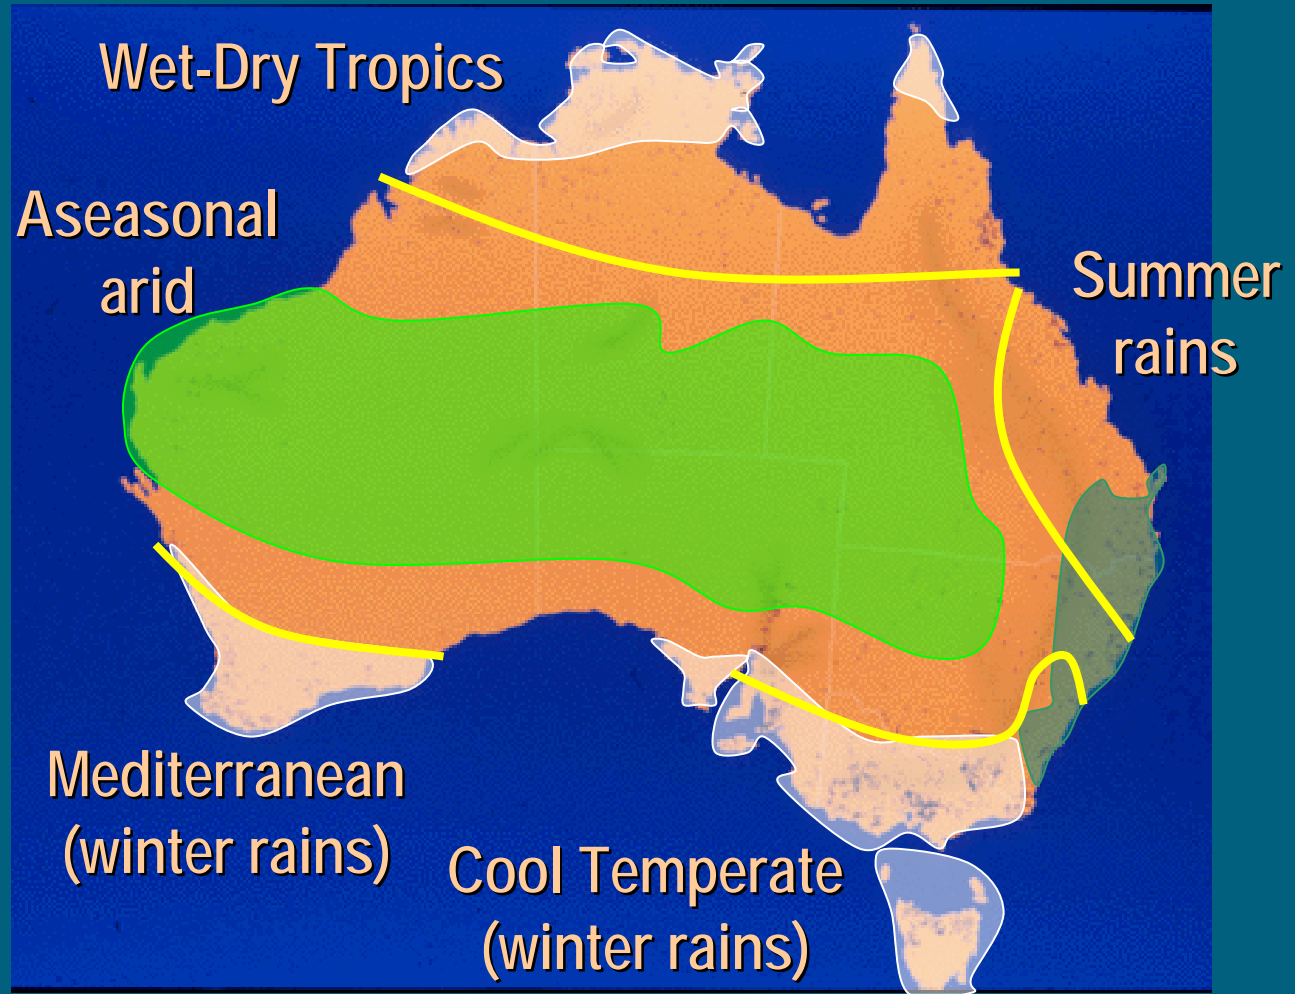

Temporal variability in macroinvertebrate community composition

Rainfall variability

High → Extreme

Low → Moderate

“Resolving Key Issues”

Interpretable outputs for water resource managers

Regional Workshops and surveys

O/E Number of taxa

O/E of SIGNAL scores

(SIGNAL = Australian
analogue of BMWP or
SASS)

Bands
A, B, C, D

(where A is > or < 80% of
reference site O/E values)

AUSRIVAS - Australian River Assessment System

- Nationally standardized system
- Some regionalization for climatic ranges but standard outputs
- Easy to use and interpret outputs
- Central management and access control
- **Aim: To demonstrate how the science behind biological monitoring has been packaged and delivered for easy use**

AUSRIVAS: components

METHODS

- Standardized methods for sampling and data analysis
- Happy alliance between feds, states & researchers

SOFTWARE

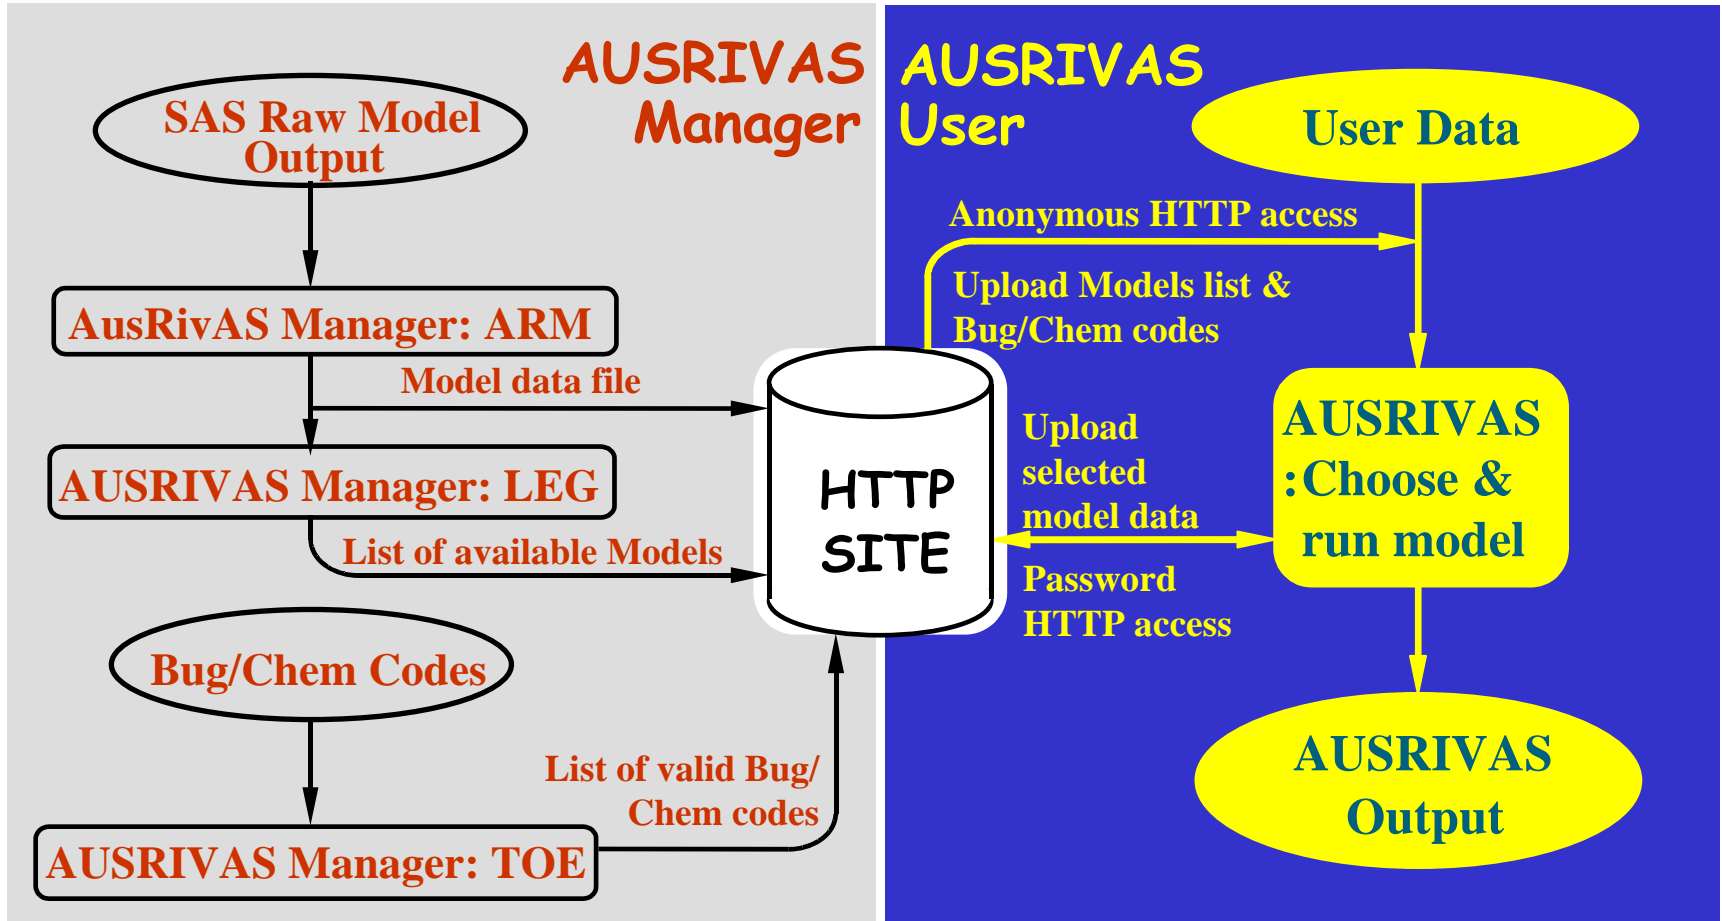

- Internet based and managed with access to models password controlled
- Central management and control over access

MODELS

- >50 covering all of Australia - small derived data sets - final steps in analysis with client data

AUSRIVAS: How does it work?

National River Health Program

AUSRIVAS: Bug data input

AusRivAS Document - AusRivAS

AUSRIVAS: Advantages

- ✧ Standard method with nationally comparable results
- ✧ Updates to software and models available immediately
- ✧ Standardized methods approved for adoption by NATA & included in National WQ guidelines
- ✧ Utilitarian platform to run complex analyses
- ✧ Web site with troubleshooting and advice
- ✧ Wide range of registered users
- ✧ Manual with video clips included, training & accreditation

Adoption & implementation of AUSRIVAS

- AUSRIVAS formally adopted as a national indicator for **State of the Environment Reporting** at Federal and State levels in 1997-8
- AUSRIVAS being incorporated into new **National Water Quality Guidelines** in 1998/9
- AUSRIVAS being progressively adopted into state **licensing and catchment management legislation**

Conclusion

- ✧ AUSRIVAS program and manual available via the Internet. Science packaged easy use.
<http://ausrivas.canberra.edu.au/ausrivas>
- ✧ Models by habitat, season & regions if necessary
- ✧ Ultimately many users - agencies, Waterwatch, consultants etc.
- ✧ Flexible management and up-dating needs
- ✧ Updates easily done and immediately available
- ✧ Troubleshooting and advice available
- ✧ Widely adopted in legislation & management
