GOMA Wednesday Webinar Series

GOMA is hosting a Wednesday Webinar series, the last Wednesday of every other month at 2:00pm Central/3:00pm Eastern.

This is the last webinar of the year, November 28th. We will have a presentation on **Harmful Algal Blooms (HABS) Detection** with Kate Hubbard of the Florida Fish and Wildlife Conservation Commission. GOMA is co-hosting with the National Water Quality Monitoring Network. Make sure you have the correct information with this updated flyer as participant login for this one webinar is different than those previously held.

November 28 - HAB Detection (Kate Hubbard)
Pre-registration for this webinar IS required (though not always the norm).
